

DISCLAIMER

This report was prepared by the Working Group for the “Study on Effective Investment of Power Infrastructure in East Asia through Power Grid Interconnection” under the Economic Research Institute for ASEAN and East Asia (ERIA) Energy Project. Members of the Working Group, who represent the participating EAS region countries, discussed and agreed to utilize certain data and methodologies proposed by the Institute of Energy Economics, Japan (IEEJ) to assess the optimal power supply infrastructure for this study. These data and methodologies may differ from those normally used in each country. Therefore, the calculated result presented here should not be viewed as official national analyses of the participating countries.
