

## Co-publications

### **Production Networks in Southeast Asia**

*Edited by Lili Yan Ing and Fukunari Kimura*

This book answers the recently topical questions of how China's processed trade affects the trade of Southeast Asia. What is Southeast Asia's role in Factory Asia, the region's complex of cross-border supply chains? What is Southeast Asia's involvement in building or joining production networks in the region? And, most important, how can Southeast Asia increase the value added of its products and improve its competitiveness?

## **Investing in Low-Carbon Energy Systems**

*Edited by Venkatachalam Anbumozhi, Kaliappa Kalirajan, Fukunari Kimura, Xianbin Yao*

This book focuses on multi-level actions that have attracted considerable interest and discussion within academia, decision-makers and the public as a tool to assess anthropogenic effects of low-carbon energy development. The book begins with an overview of the state-of-the-art policies in emerging economies, which provides a starting point for understanding the concept of low-carbon green growth. A unified framework for structuring, categorising, and integrating various regional-level actions is established based on a thorough investigation into the theoretical and methodological aspects of non-conventional energy policies that have been widely adopted. Furthermore, the book brings clarity to the relationship between clean energy policies and stakeholder participation, and the significance of coordinated actions at the regional level. The findings provide novel insights and policy tools to help decision-makers in identifying ways to mobilise private investment in low-carbon energy systems.
