

## List of Figures

Figure ES.1	Potential of Reducing CO <sub>2</sub> , by Scenario (2040)	xiv
Figure 2.1	Comparison of IEEJ Scenario and Malaysia’s INDC	4
Figure 2.2	GHG Intensity of GDP Projections Based on the INDC	4
Figure 2.3	Trends in GDP, Primary Energy Supply, and Final Energy Consumption	5
Figure 2.4	Final Energy Consumption, by Sector	6
Figure 2.5	Electricity Generation Mix, by Fuel Type, 2016	7
Figure 2.6	Trends in Vehicle Numbers and Population Growth in Malaysia	8
Figure 2.7	CO <sub>2</sub> Emissions from Fuel Combustion, 2015	9
Figure 2.8	CO <sub>2</sub> Emissions, by Transport Mode, 2015	10
Figure 2.9	CO <sub>2</sub> Emissions of Land Transport, by Mode	10
Figure 2.10	Targets in the Power Sector	11
Figure 2.11	Energy-Efficient Vehicles	12
Figure 2.12	Main Targets in the Transport Sector	13
Figure 2.13	Outline of the National Land Public Transport Master Plan	15
Figure 2.14	Outline of GKL/KV Land Public Transport Master Plan	15
Figure 2.15	Nine Sectors in the Malaysian ITS Blueprint 2017–2022	18
Figure 2.16	Mobility Design for the Future	19
Figure 3.1	Structure of EV and FCEV	20
Figure 3.2	New Car Sales and Market Share of Next-Generation Vehicles in Japan	21
Figure 3.3	Trend in New Car Sales of Hybrid Vehicles Worldwide	22
Figure 3.4	Japan’s Roadmap for Electric Vehicles and Plug-in Hybrid Vehicles (Share amongst New Car Sales)	22
Figure 3.5	Deployment of Electricity-Driven Vehicles	23
Figure 3.6	Japan’s Roadmap for Hydrogen and Fuel Cells	24
Figure 3.7	Cost Reduction of Fuel Cell Vehicles	25
Figure 3.8	Classification of Charging Infrastructure	25
Figure 3.9	Number of Public Chargers in Japan	27
Figure 3.10	Global Sales of Electric Vehicles	28

Figure 3.11	Number of Electric Vehicles on the Road	28
Figure 3.12	Examples of Financial Support from Government	29
Figure 3.13	Number of Electric Vehicle Chargers	30
Figure 3.14	Improvements on Li-ion Batteries	30
Figure 3.15	Improvements on Li-ion Batteries: Effects of Size and Production Volumes on Costs	31
Figure 3.16	Li-ion Batteries: Further Cost Reductions	31
Figure 3.17	Relationship between Vehicle Velocity and CO <sub>2</sub> Emissions	32
Figure 4.1	Microfit Result for Total Number of Vehicles	38
Figure 4.2	Projection of Total Number of Vehicles, 2015–2040	39
Figure 4.3	Microfit Result for Energy Consumption of Motor Gasoline in Land Transport	40
Figure 4.4	Microfit Result for Energy Consumption of Diesel in Land Transport	41
Figure 4.5	Microfit Result for Energy Consumption of Natural Gas in Land Transport	42
Figure 4.6	Final Energy Consumption in Land Transport, by Fuel (BAU Scenario)	43
Figure 4.7	Final Energy Consumption in Land Transport, by Mode (BAU Scenario)	43
Figure 4.8	CO <sub>2</sub> Emissions in Land Transport, by Fuel (BAU Scenario)	44
Figure 4.9	CO <sub>2</sub> Emissions in Land Transport, by Mode (BAU Scenario)	45
Figure 4.10	Total Final Energy Consumption in Land Transport, by Scenario	46
Figure 4.11	Total CO <sub>2</sub> Emissions in Land Transport, by Scenario	46
Figure 4.12	Total Final Energy Consumption in Land Transport, BAU and APS	47
Figure 4.13	Total CO <sub>2</sub> Emissions in Land Transport, BAU and APS	48
Figure 4.14	Power Generation Mix for BAU and APS, 2040	49
Figure 4.15	CO <sub>2</sub> Emissions in Power Generation, BAU and APS	49
Figure 5.1	Potential of Reducing CO <sub>2</sub> , by Scenario (2040)	50
Figure 5.2	Innovative Four Drives to Change Future Mobility	54
Figure 5.3	Autonomous Driving Society for the Future	55
Figure 5.4	Car-Sharing: Number of Vehicles and Membership in Japan	56
Figure 5.5	Integrated Approach by Four Pillars	58

Figure 5.6	Well-to-Wheel CO <sub>2</sub> Emissions in Vehicle Type	59
Figure 5.7	Power Generation Mix Forecast for Malaysia	59
Figure 5.8	Illustration of EV Charging by Solar Power	60
Figure 5.9	Trajectory towards CO <sub>2</sub> Reduction	60
Figure 5.10	Examples of In-Use EV Incentive	61
Figure 5.11	Malaysia's National Load Profile	62
Figure 5.12	EV Battery Usable as Storage Battery	62
