DISCLAIMER

This report was prepared by the Working Group for Analysis of Energy Saving Potential in East Asia under the ERIA (Economic Research Institute for ASEAN and East Asia) Energy Project. Members of the Working Group from the participating EAS region countries discussed and agreed to certain key assumptions and modelling approaches in order to enable harmonisation of the forecasting techniques. These assumptions and modelling approaches may differ from those normally used in each country. Therefore, the projections presented here should not be viewed as official national projections of the participating countries.

The absence of a projection for the Alternative Policy Scenario (APS) for a country does not imply that the country has no energy efficiency and conservation (EEC) policies. It may simply indicate that, at the time of the study, the country had not yet quantified the impacts of their EEC policies.
FOREWORD

Energy security and climate change are very important global issues with a range of socioeconomic, environmental and development dimensions. At the 2nd East Asia Summit (EAS) in Cebu Island of the Philippines, January 2007, the leaders of the region declared that East Asia could mitigate these problems by strong leadership on several countermeasures. These include: a. promotion of energy conservation, b. utilisation of biofuels and c. cleaner use of coal.

Two groups were designated to assist in implementing the countermeasures mentioned above: the Energy Cooperation Task Force (ECTF) and the Economic Research Institute for ASEAN and East Asia (ERIA). ECTF is charged with supporting the efforts of the EAS and its Energy Ministers Meeting (EMM) to promote cooperation on policies to implement these countermeasures. ERIA is in charge of studying the potential impacts of the countermeasures. ERIA is focusing on energy studies in two areas: first, promotion of energy conservation and second, utilisation of biofuels.

This report was prepared by the Working Group for Analysis of Energy Saving Potential in East Asia under the ERIA Energy Project. The report covers all the research activities of the Working Group from October 2008 to June 2009, including the methodology used to estimate the impacts of a range of energy saving goals, action plans and policies, analysis of results and potential policy recommendations to the ECTF. This report extends and enhances the analysis of the working group undertaken in 2007.

This report contributes to mitigating problems related to energy security and climate change through increasing understanding of the potential for energy savings of a range of energy efficiency goals, action plans and policies. A number of key insights for policy development are also discussed.

Mr. Shigeru Kimura
Leader of the Working Group
2009
ACKNOWLEDGEMENTS

This analysis has been implemented by a working group under the ERIA Energy Project. It was a joint effort of Working Group members from the EAS countries and IEEJ (The Institute of Energy Economics, Japan). We would like to acknowledge the support provided by everyone involved. We would especially like to take the opportunity to express our gratitude to the members of the Working Group, the Economic Research Institute for ASEAN and East Asia, the Office for Economic Development and Integration in East Asia of METI, the Energy Conservation and Renewable Energy Department of ANRE/METI, the International Affairs Division of ANRE/METI, and IEEJ’s Energy Outlook Modelling Team.

Special acknowledgement is also given to Ms. Melanie Ford of Australia and Ms. Cecilya Laksmiwati Malik of Indonesia for their contributions in the writing and editing of this report.

Mr. Shigeru Kimura
Leader of the Working Group
2009
MEMBER LIST

Working Group
Leader:  Mr. Shigeru Kimura  
Senior Research Fellow  
The Energy Data and Modelling Unit (EDMC)  
The Institute of Energy Economics, Japan (IEEJ)

Australia:  Ms. Melanie Ford  
Manager  
Climate Change and Modelling Section  
Australian Bureau of Agricultural and Resource Economics (ABARE)

Brunei Darussalam:  Ms. Noor Dina Zharina Haji Yahya  
Special Duties Officer  
Energy Division  
Prime Minister’s Office

Cambodia:  Mr. Heng Kunleang  
Director  
Energy Development Department  
Ministry of Industry, Mines and Energy

China:  Dr. Bai Quan  
Deputy Director  
Energy Efficiency Center, Energy Research Institute  
National Development and Reform Committee

India:  Dr. Pradeep Dadhich  
Senior Fellow  
Resources and Global Security Division  
Tata Economic Research Institute (TERI)
Indonesia:  Ms. Cecilya Laksmiwati Malik
Senior Researcher
Energy Planning Division
Agency for the Assessment and Application of Technology (BPPT)

Japan:  Mr. Edito Barcelona – Senior Researcher
Ms. Momoko Aoshima – Researcher
The Energy Data and Modelling Unit (EDMC)
The Institute of Energy Economics, Japan (IEEJ)

Republic of Korea:  Dr. Soo-Il Kim
Research Fellow
Energy Supply and Demand Analysis Division
Energy Economics Institute (KEEI)

Lao PDR:  Mr. Khamso Kouphokham
Chief
Administrative Division, Department of Electricity
Ministry of Energy and Mines

Malaysia:  Ms. Siti Indati Mustapa
Programme Manager
Data Management and Statistics Unit
Malaysia Energy Center

Myanmar:  Mr. Pe Zin Tun
Director
Energy Planning Department
Ministry of Energy

New Zealand:  Mr. Simon Lawrence
Manager
Energy Information & Modelling Group, Energy and Communication Branch
Ministry of Economic Development
Philippines: Ms. Lilibeth T. Morales
Science Research Specialist II
Policy Formulation and Research Division
Energy Policy and Planning Bureau, Department of Energy

Singapore: Ms. Wei Mei Hum
Analyst
Energy Policy and Planning Division
Energy Market Authority

Thailand: Mr. Boonli Sillavatkul
Director
Energy Information System Development Division
Energy Policy and Planning Office
Ministry of Energy

Vietnam: Dr. Nguyen Quoc Khanh
Senior Researcher
Energy Economics and Demand Forecast Group
Institute of Energy

Coordinator: Mr. Soji Samikawa
Research Coordination Director
Economic Research Institute for ASEAN and East Asia
