

List of Figures

	Page
Figure 1 Estimate of vehicle numbers in Asia.....	1
Figure 2 Resources and fuels.....	2
Figure 3 ERIA’s research projects and its relationship to Leaders’ requests.....	4
Figure 4 NYMEX WTI Variation in Crude Oil Price (US dollar/bbl)	9
Figure 5 Variation in Annual Average (a) Natural Gas Price (US dollar/million BTU) and (b) Coal Price (US dollar/ton).....	10
Figure 6 Variation in Grain Prices	13
Figure 7 Expected Cost of Second Generation Bio-fuels.....	14
Figure 8 Amount of Bio-fuel Introduction in BLUE Scenario.....	15
Figure 9 WWFC committee member organizations.....	22
Figure 10 Outline of the fuel quality categories in WWFC	22
Figure 11 B100 specifications and test methods	24
Figure 12 (a) Principle of Rancimat method with (b) its conductivity measurement and (c) experimental setup	28
Figure 13 Example of market experience with problem from poor quality FAME	29
Figure 14 Relationship between oxidation stability and iodine number	30
Figure 15 Effects of poly-unsaturated methyl esters on sludge formation.....	31
Figure 16 Effects of oxidation stability on fuel tank corrosion.....	32
Figure 17 Fuel tank materials in Asia.....	33
Figure 18 Oxidative stability in circulation proof examination effect confirmation by (a) transition tank washing A, (b) transition tank washing B and (c) Antioxidant Additive.....	34
Figure 19 (a) PetroOXY equipment and (b) the relationship between Rancimat and PetroOXY with B100 samples.....	36
Figure 20 Fatty acid profile of various biodiesel feedstocks.....	37
Figure 21 Composition of FAME derived from various biodiesel feedstocks	40
Figure 22 Oxidation stability of model FAME compounds after Rancimat tests	40
Figure 23 Concept for partial hydrogenation of FAME	42
Figure 24 Partial hydrogenation for upgrading conventional FAME.....	43
Figure 25 Comparison of partial hydrogenation for FAME upgrading and hydro- deoxydation (HDO) for second generation biodiesel production.....	43
Figure 26 Changes in composition of FAME derived from crude palm oil, rapeseed oil, soybean oil, jatropha oil and waste cooking oil after partial hydrogenation .	45

Figure 27 Melting point of FAME.....	48
Figure 28 CFPP of Biodiesel / Diesel blend.....	49
Figure 29 Wax separation of temperature circulation test.....	51
Figure 30 Cloud point and CFPP of various FAMES	52
Figure 31 Treatability of FAME B100 with cold flow additives.....	53
Figure 32 Impact of various FAMES on cold flow performance.....	54
Figure 33 An example of the effectiveness of cold flow improvers for an SME blended B5.....	54
Figure 34 Effect of diesel fuel, ethanol and DME blend ratios on the (a) cloud point and (b) pour point of PME.....	56
Figure 35 Pictorial solidification process of PME at 20°C.....	58
Figure 36 (a) Solidification pressure of PME and RME, and its effect by DME and diesel fuel blend ratios	59
Figure 37 Process flow diagram of normal and winter grades palm biodiesel technology	61
Figure 38 Palm biodiesel winterization plant at Sime Dardy Biodiesel Sdn. Bhd., Malaysia.....	62
Figure 39 Various parts (i.e. flowers, fruits and seeds) of the tree <i>Jatropha curcas</i> L....	64
Figure 40 Estimated rice production in the world.....	67
Figure 41 Historical plots of (a) export by main rice producing countries and (b) rice production area and an unit production quantity.....	68
Figure 42 Process flow scheme of rice bran oil for cooking.....	69
Figure 43 Utilization of rice and rice bran oil	70
Figure 44 Fatty acid methyl ester components of raw materials.....	72
Figure 45 Production of biodiesel with co-process and co-products.....	74
Figure 46 Logo of European biodiesel fuel quality control scheme AGQM.....	78
Figure 47 Logo of American biodiesel fuel quality control scheme BQ-9000	79
Figure 48 The fuel quality control scheme in Japan.....	79
Figure 49 KIER test results for (a) emission and fuel economy with rice bran biodiesel, and (b) troubled fuel filter due to insufficient biodiesel quality	85
Figure 50 Experimental setup showing (a) Kubota engine coupled with electricity generator and (b) resistance heater coil	90
Figure 51 Applied load pattern of (a) performance test and (b) durability test, both at full throttle.....	91
Figure 52 Performance test results of engine before and after running on (a) diesel: engine no. 1, (b) biodiesel: engine no. 2 and (c) biodiesel: engine no. 3 for	

2,000 hrs.....	92
Figure 53 Black smoke test results of engine before and after running on (a) diesel: engine no. 1, (b) biodiesel: engine no. 2 and (c) biodiesel: engine no. 3 for 2,000 hrs.....	93
Figure 54 Specific fuel consumption test results of engine before and after running on (a) diesel: engine no. 1, (b) biodiesel: engine no. 2 and (c) biodiesel: engine no. 3 for 2,000 hrs	94
Figure 55 Visual inspection of top fuel tank (show inner surface) reveals rusty surface in all cases with highest amount in Engine No. 3	95
Figure 56 Biomass Town Concept in Japan	111
Figure 57 Outline of Next-Generation Automobiles and Fuels.....	112
Figure 58 Example of Consumer Incident caused by Fuel Quality.....	113
Figure 59 Influence of Raw Materials and Refining Process on FAME Characteristics	115
Figure 60 Important FAME Properties and their Expected impact on	115
Figure 61 Effect of Anti-Oxidant Agent on Oxidation Stability.....	117
Figure 62 Difference in Fuel Regulations between Europe and Japan.....	118
Figure 63 Strategy for biodiesel research, development and promotions in The Philippines	139
Figure 64 Biodiesel sales in Korea.....	158
Figure 65 Energy consumption in transport sector.....	160
Figure 66 World Biodiesel Production	170
Figure 67 Biodiesel production and installed capacity of the European Unions.....	172
Figure 68 A breakdown of biodiesel production in the European Union	172
Figure 69 Biodiesel production and installed capacity in the USA.....	174
Figure 70 New and Expanded Biodiesel Capacity in 2008 and Outlook for 2009 in Asia Pacific	177
Figure 71 Biodiesel Feedstock around the world	180
Figure 72 Historical prices of coconut, soybean, palm and rapeseeds Oil versus diesel	180
Figure 73 US historical price of diesel versus biodiesel from 2005 to 2008.....	182
Figure 74 German historical price of diesel versus biodiesel.....	183
Figure 75 Various bio-fuel production processes	186
Figure 76 Production processes of FAME and hydrogenated biofuels	187
Figure 77 On-road testing of hydrogenated bio-fuels using a hybrid bus.....	189
