

ACKNOWLEDGEMENTS

This analysis has been implemented by the Institute of Energy Economics, Japan (IEEJ) under the Economic Research Institute for ASEAN and East Asia (ERIA). We would like to acknowledge the support provided by everyone involved, particularly the members who participated in the one-day workshop meeting for this study held in Jakarta on 25 April 2016. The authors would like to express special thanks to Mr Cuauhtemoc Lopez-Bassols of the International Energy Agency for his valuable comments and information.
