

► Acknowledgements

This statistics publication was developed by a working group consisting of a team from Cambodia and another from the Economic Research Institute for ASEAN and East Asia (ERIA). The team from Cambodia consisted of staff of the General Department of Petroleum (GDP) and the General Department of Energy (GDE) of the Ministry of Mines and Energy (MME), Cambodia. The ERIA team consisted of six experts in energy statistics, information technology, building and industry energy consumption, and legal framework. We would like to acknowledge the members of the working group for their excellent work. We would also like to especially take this opportunity to express our gratitude to the petroleum companies in Cambodia for their cooperation in this project through their submission of petroleum demand–supply data to the GDP.

Special acknowledgement is also given to Mr Shigeru Kimura, Special Advisor to the ERIA President on Energy Affairs, for his excellent leadership of this project.
