Foreword	xv
Executive Summary <i>Masahito Ambashi</i>	xvii
1 Introduction to Innovation Policy in ASEAN	1
<hr/>	
<i>Masahito Ambashi</i>	
1.1 Is Innovation Indispensable for ASEAN?	1
1.2 Innovative Activities in ASEAN	3
1.2.1 Innovation capability	3
1.2.2 Data on innovative activities in ASEAN	4
1.2.3 Empirical observations of existing studies	8
1.3 Efforts towards Innovation in ASEAN	9
1.4 Typology for Innovation Policy in ASEAN	11
1.5 National and Region-wide Innovation Policies	15
1.5.1 National innovation system	15
1.5.2 Region-wide innovation policies for ASEAN	18
1.6 Concluding Remarks	19
References	20
2 Theoretical Framework for Innovation Policy in ASEAN	23
<hr/>	
<i>Nobuya Fukugawa</i>	
2.1 Introduction	23
2.2 What Is Innovation?	23
2.3 Why Innovation?	24
2.3.1 Welfare improvement	24
2.3.2 Determinants of labour productivity growth	28

2.4	What Drives Innovation?	31
2.4.1	Determinants of innovation	31
2.4.2	Systems of innovation	33
2.5	How to Encourage Innovation?	38
2.5.1	Theoretical implications for innovation policy	38
2.5.2	Innovation intermediaries	40
2.5.3	Entrepreneurship	43
2.5.4	Whole-of-government approach	46
2.6	Conclusion	49
	References	52
3	 Innovation Policy in China	61
	<i>Yanfei Li and Dayong Zhang</i>	
3.1	Introduction	61
3.2	The Innovation Situation in China	64
3.3	Analysis of Innovation Policies Undertaken in China	69
3.3.1	Theory and quantitative analysis	69
3.3.2	Industry cases	83
3.4	Future Innovation Policies in China	91
3.5	Conclusion and Implications for ASEAN Economies	92
	References	93
4	 Innovation Policy in Indonesia	96
	<i>Yose Rizal Damuri, Haryo Aswicahyono, and David Christian</i>	
4.1	Introduction	96
4.2	Current Situation and Indicators of Innovation in Indonesia	97
4.3	Lessons from Past Innovation Policies in Indonesia	106
4.3.1	Examples of past innovation initiatives or interventions	111
4.3.2	Tax incentives for research and development activities	113
4.3.3	Local innovation initiatives in Bandung	114
4.4	Toward a More Conducive Environment for Innovation	116
4.4.1	The role of foreign direct investment and global value chain participation for inducing greater innovation	116
4.4.2	The role of improved key innovation enablers and infrastructure	119
4.4.3	The role of a formal, integrated, well-functioning innovation system	121
4.4.4	The role of local innovation initiatives	123

4.5	Conclusion and Summary of Recommendations	124
	References	125
5 	Innovation Policy in Malaysia	128
	<i>Suresh Narayanan and Lai Yew-Wah</i>	
5.1	Introduction	128
5.2	Current State of Innovation	129
	5.2.1 Micro indicators	129
	5.2.2 Macro indicators	135
	5.2.3 Global rankings	139
5.3	Innovation Policies	143
	5.3.1 First National Science and Technology Policy, 1986–1989	143
	5.3.2 Industrial Technology Development National Action Plan, 1990–2001	143
	5.3.3 Second National Science and Technology Policy, 2002–2010	144
	5.3.4 National Policy on Science, Technology and Innovation, 2013–2020	144
	5.3.5 Science, technology, and innovation sector policies	145
	5.3.6 Malaysia’s national innovation system	145
	5.3.7 Public funding for innovation	148
	5.3.8 Case examples	149
5.4	Future Innovation Policies	154
	5.4.1 Consolidating agencies and institutions in the national innovation system	154
	5.4.2 Making research and development incentives work	155
	5.4.3 Strengthening links	155
	5.4.4 Improving the contribution of patents and intellectual property	156
	5.4.5 Establishing a competitive business environment	157
	5.4.6 Building the talent pool	157
5.5	Conclusion	158
	References	159
6 	Innovation Policy in the Philippines	163
	<i>Francis Mark A. Quimba, Jose Ramon G. Albert, and Gilberto M. Llanto</i>	
6.1	Introduction	163
	6.1.1 Outline	164

6.2	Current Situation of Innovation of Local Firms	164
6.2.1	Description of innovation activity	164
6.2.2	Sources of information, cooperation, and knowledge management	170
6.2.3	Determinants of innovation activity	174
6.3	History of Innovation Policy in the Philippines	177
6.4	Case Studies of Successful Innovation Activities and Policies	182
6.4.1	Framework for the selection of case studies	182
6.4.2	Innovation in the automotive sector	183
6.4.3	Innovation in the food manufacturing sector	183
6.4.4	Technology transfer and innovation in the pharmaceutical industry	186
6.4.5	Supporting micro, small, and medium-sized enterprises	188
6.4.6	Supporting entrepreneurship	189
6.4.7	A new framework for industry–academe collaboration	191
6.5	Future Innovation Policy in the Philippines	193
6.6	Summary and Conclusion	195
	References	195
7 	Innovation Policy in Singapore	198
	<i>Hank Lim</i>	
7.1	Introduction	198
7.2	Conceptual Framework	200
7.3	Key Processes in Developing Knowledge-based Clusters	202
7.3.1	Key knowledge–cluster components	202
7.3.2	Role of the state in developing knowledge clusters	203
7.4	Case Studies	204
7.4.1	Developing a mature cluster: The offshore marine engineering cluster	204
7.4.2	Creating a new cluster: The biomedical sciences cluster	207
7.5	Conclusion	212
	References	214
	Appendix	215
8 	Innovation Policy in Thailand	218
	<i>Saowaruj Rattanakhomfu and Somkiat Tangkitvanich</i>	
8.1	Introduction	218
8.2	State of Innovation in Thailand	225
8.2.1	Research and development inputs	225

8.2.2	Research and development outputs and efficiency	230
8.2.3	Local companies active in innovation	234
8.3	Innovation Governance and Policies in Thailand	235
8.3.1	Governance structure of the innovation system	235
8.3.2	R&D targets and policy measures	236
8.3.3	Other schemes to promote innovation activities	240
8.4	Future Directions for Innovation Policies in Thailand	241
8.4.1	Increase public investment in R&D	241
8.4.2	Create accountability in publicly funded research	241
8.4.3	Create a specialised government research institute	242
8.4.4	Improve human resources policies	242
8.5	Conclusion and Summary of Policy Recommendations	243
	References	243
9 	Innovation Policy in Viet Nam	247
<hr/>		
	<i>Tri Thanh Vo, Anh Duong Nguyen, and Thu Hang Dinh</i>	
9.1	Introduction	247
9.2	Evolution of Innovation Policy in Viet Nam	248
9.2.1	Definition of innovation	248
9.2.2	The evolution of innovation policy in Viet Nam	249
9.2.3	Intellectual property rights protection in Viet Nam	253
9.3	Innovation Performance in Viet Nam	254
9.3.1	Innovation competitiveness	254
9.3.2	Science and technology actors	256
9.3.3	Science and technology human resources	257
9.3.4	Science and technology finance	258
9.3.5	Science and technology infrastructure	259
9.3.6	Science and technology products	260
9.4	Major Issues	263
9.4.1	Inadequate pro-innovation policy environment	263
9.4.2	Narrower policy space for supporting science and technology development and innovation	268
9.4.3	Inadequate innovation linkages	269
9.5	Conclusion and Recommendations	272
9.5.1	Conclusion	272
9.5.2	Recommendations	273
	References	275

10 Innovation Policy, Inputs, and Outputs in ASEAN	277
<hr/>	
<i>Rajah Rasiah</i>	
10.1 Introduction	277
10.2 Theoretical Considerations	278
10.3 Methodology and Data	282
10.4 Innovation Policies and Infrastructure	283
10.4.1 Indonesia	285
10.4.2 Malaysia	287
10.4.3 Philippines	292
10.4.4 Singapore	294
10.4.5 Thailand	296
10.4.6 Viet Nam	300
10.5 Innovation Inputs	303
10.5.1 Gross expenditure on research and development	303
10.6 Innovation Outputs	307
10.6.1 High-tech exports in manufacturing	307
10.6.2 Patents	308
10.6.3 Scientific publications in journals	310
10.6.4 Intellectual property	311
10.7 Conclusion	313
References	315
11 Conclusion and Policy Recommendations	321
<hr/>	
<i>Masahito Ambashi</i>

TABLES, FIGURES, AND BOXES

TABLES

1.1	Research and Development Intensity	5
1.2	Direct Patent Applications	6
1.3	Number of Research and Development Researchers	7
1.4	Policy Framework Typology for ASEAN	14
2.1	Government Interventions to Support Private Research and Development	39
2.2	Rates of Return to Research and Development and Appropriate Government Interventions	39
2.3	Innovation Policy from the Perspective of Industrial Knowledge Bases	51
3.1	Brief History of Policies and Institutions for Scientific and Technological Development and Innovation in China, 1950–2016	67
3.2	Connectedness Table Based on Variance Decomposition	79
3.3	Summary of Variable Definitions	81
3.4	Connectedness Table of the Estimated Vector Autoregressive Model	81
3.5	Anecdotal Evidence of the Driving Factors in Chinese Industries' Technological Catching Up and Innovation	84
4.1	Intellectual Property Index for Selected Countries, 2010–2015	103
4.2	Number of Intellectual Property Rights Registrations in Indonesia, 2010–2015	103
5.1	Contribution to Gross Domestic Product by Sector, 1980–2016	128
5.2	Extent of Innovation	130
5.3	Development of 'New' Products and 'Significantly Improved' Products in Manufacturing, 2009–2011	131
5.4	Types of Innovation in Manufacturing, 2005–2006	131
5.5	Modes of Access to Technology	132
5.6	Marginal Effects of the Predictors of Innovation	133
5.7	Number of Research and Development Personnel by Sector	138
5.8	Patents Granted by the United States Patent and Trademark Office	139

5.9	Global Innovation Index	140
5.10	Innovation Efficiency Ratio, Innovation Input and Output Sub-indices	141
5.11	Global Competitiveness Index, 2011–2016	141
5.12	Global Competitiveness Index Pillar Scores and Rankings of Malaysia, 2011–2016	142
5.13	University–Industry Research and Development Collaboration, 2011–2016	151
5.14	Collaborative Research and Development Funding, 2006–2011	152
6.1	Key Statistics on Innovation by Activity and Major Industry	166
6.2	Key Statistics on Innovation by Activity and Size	167
6.3	Proportion of Establishments Rating Information Sources as of Medium or High Importance, by Size of Establishment	170
6.4	Proportion of Establishments Rating Information Sources as of Medium or High Importance, by Type of Industry	171
6.5	Proportion of Innovative and Cooperative Firms by Cooperation Partner	172
6.6	Knowledge Management Practices by Sector	173
6.7	Knowledge Management Practices by Firm Size	174
6.8	Proportion of Firms with Intellectual Property Applications	174
6.9	Proportion of Firms Using Intellectual Property Products to Maintain or Increase Competitiveness	175
6.10	Determinants of Innovation Activity Using Panel Data, Odds Ratios	176
6.11	Filipinnovation Strategies, Tactics, and the Action Agenda	179
8.1	Change in Potential Output Growth and Its Components between 2000–2007 and 2008–2013	224
8.2	Thai Research and Development Personnel, 2001–2015	228
8.3	Resident Applications for Patent by Origin, 2010–2015	230
8.4	Licensing Agreements and Licensing Revenue of Research Universities in Thailand	232
8.5	Examples of University–Industry Collaboration	233
8.6	Examples of Thai Companies Active in Research and Development and Innovation	234
8.7	Schemes to Promote Innovation Activities Other than Research and Development	240
9.1	Common Aspects of Structural Reforms and Innovation at Different Levels of Economic Development	249
9.2	Viet Nam’s Global Competitiveness Index	254

9.3	Innovation Sub-index of Viet Nam in the Global Competitiveness Index, 2008–2017	255
9.4	Viet Nam’s Science and Technology Organisations, 2014	256
9.5	Viet Nam’s Research and Development Human Resources by Organisational Status and Educational Level, 2013	257
9.6	Full-time Equivalent Research and Development Personnel of Viet Nam and Selected Economies	258
9.7	Gross Expenditure on Research and Development in Viet Nam and Selected Economies	260
9.8	Share of Viet Nam’s Exports and Imports by Technological Level, 2000–2014	261
9.9	International Applications by Viet Nam via World Intellectual Property Organization-administered Treaties	262
9.10	Origin of Viet Nam’s Intellectual Property-related Applications, 2006–2015	263
9.11	Structure of Budget Expenditure by Educational Level, 2006–2014	267

FIGURES

1.1	National and Region-wide Innovation Policy	15
1.2	National Innovation Systems of Leading Asian Countries	17
2.1	Living Standards of ASEAN Member States	25
2.2	Improvement in Living Standards in ASEAN Member States	26
2.3	Decomposition of the Improvement in Living Standards	27
2.4	Contribution of Total Factor Productivity Growth to Labour Productivity Growth	28
2.5	Decomposition of Total Factor Productivity Growth in Japan’s Manufacturing Sector	30
2.6	Appropriation of and Access to Knowledge as Determinants of Innovation	32
2.7	Effects of Knowledge Spillovers on Innovation and Their Policy Implications	37
2.8	National Innovation Systems	38
2.9	Entrepreneurship as a Channel for the Diffusion of Innovation	44
2.10	Explaining the Whole-of-government Approach Using a Gardening Metaphor	46
2.11	Research and Development Intensity in ASEAN Member States	48
2.12	Patent Applications by Residents in ASEAN Member States	49
2.13	Patent Applications by Non-residents in ASEAN Member States	50
3.1	Gross Domestic Spending on Research and Development, 1981–2014	62
3.2	Institutional Profile of Public Governance of Science, Technology, and Innovation in China	68

3.3	Product, Technology, and Industry Life Cycle Theories	70
3.4	International Product Life Cycle	71
3.5	S-Curve Theory of Technological Advances and Innovation	72
3.6	S-Curve Theory of Technological Advances and Innovation: Backstop Technology	72
3.7	Inverted S-Curve of Technological Advances or Innovation and Learning Cost	73
3.8	Inverted S-Curve of Technological Advances or Innovation and Learning Cost: Latecomer	74
3.9	Learning Curve and Catching Up through Independent Research and Development	76
3.10	General Framework of the Driving Factors of Technological Catching Up and Innovation	78
3.11	Contribution to Patents Granted from Other Factors	82
4.1	Total Global Innovation Index Score for Indonesia, 2011–2016	98
4.2	Global Innovation Index for Indonesia: Ranking of Selected Innovation Enablers	98
4.3	Global Innovation Index 2016 Score for Selected Asian Countries	99
4.4	Innovation Maturity Index for Indonesia	100
4.5	Indonesia's Manufacturing Exports by Technology Intensity, 1995–2010	101
4.6	Indonesia's Manufacturing Imports by Technology Intensity, 1995–2010	101
4.7	Research and Development Expenditure for Selected Countries, 2001–2013	102
4.8	Number of Patent Applicants in Indonesia, 1991–2014	104
4.9	Number of Scientific Publications in Selected Countries, 1996–2015	104
4.10	Number of Scientific and Technical Journal Articles from Indonesia, 2000–2013	105
4.11	Government Spending on Education by Category	105
4.12	Institutional Setting for Research and Development in Indonesia	107
4.13	Basic Framework for the Design of Indonesia's National Innovation System	108
5.1	Research and Development Expenditure in Malaysia by Sector, 1992–2012	136
5.2	Research and Development Expenditure as a Proportion of Gross Domestic Product	137
5.3	Research and Development Personnel per Million Population	138
5.4	Key Public Actors in the National Innovation System, 2015	146
6.1	Breakdown of Innovation Activities by Industry Group	168
6.2	Breakdown of Innovation Activities by Size	169
6.3	Intellectual Property Rights Granted and Registered to Inventions, Utility Models, and Industrial Designs	181

A7.1	Gross Domestic Product Growth and Gross Expenditure on Research and Development, 1990–2015	215
A7.2	Gross Business and Public Expenditure on Research and Development as a Percentage of Gross Domestic Product, 1990–2015	215
A7.3	Business Expenditure on Research and Development by Type of Cost, 1990–2015	216
A7.4	Type of Business Expenditure on Research and Development, 1990–2015	216
A7.5	Business Expenditure on Research and Development by Fields of Science and Technology, 2014–2015	217
A7.6	Public Expenditure on Research and Development by Type of Cost, 1990–2015	217
8.1	Distribution of the Labour Force across Sectors, 1985–2016	219
8.2	Manufacturing Value-added Share of Gross Domestic Product, 2015	219
8.3a	Diversification of Thailand’s Exports and Markets, 2001–2016	220
8.3b	Degree of Export Diversification in Products and Markets, 2016	220
8.4	Global Value Chain Participation and Domestic Value-added Share of Selected Countries, 1990–2010	223
8.5	Research and Development Investment in Thailand, 2000–2015	226
8.6	Composition of Research Investments, Classified by Type of Research, 2014–2015	227
8.7	Research and Development Personnel, 2015	228
8.8	Share of Firms Engaged in Research and Development, Classified by Firm Type, 2014	229
8.9	Objectives of Research and Development among Firms, 2014	229
8.10	Comparing Efficiencies of Research and Development Systems	231
8.11	Use of Tax Deduction for Research and Development, 2002–2012	237
9.1	Viet Nam’s Innovation Policy: Institutional Reform and Learning Curve	250
9.2	Science and Technology State Budget Expenditure, 2006–2015	259
9.3	Patent Applications in Viet Nam by Technological Field, 2001–2015	263
9.4	Financial Source of Firms’ Research and Development, 2010–2013	265
9.5	Share of Firms in Viet Nam Doing Technology Adaptation and/or Research and Development, 2009–2013	266
9.6	University–Industry Collaboration in Research and Development, 2007–2016	270
9.7	Backward Linkages: Technology Transfer from Customers	271
9.8	Forward Linkages: Technology Transfer from Suppliers	272

10.1	Systemic Flows of Knowledge and Entrepreneurial Synergies	279
10.2	New Stocks of Knowledge Synergies	280
10.3	Gross Domestic Product per Capita of Selected ASEAN Countries, 1960–2015	284
10.4	Government Innovation Funding in Malaysia, 2012	289
10.5	Oil Palm Supply, Exports, and New Technologies and Services Developed from the Cess Fund, 2000–2014	290
10.6	Research and Development Expenditure Share of Gross Domestic Product for Selected Economies, 1996–2014	304
10.7	Research and Development Researchers in the Populations of Selected Economies, 1996–2014	305
10.8	Research and Development Technicians in the Populations of Selected Economies, 1996–2014	305
10.9	Intellectual Property Payments of Selected Economies, 1976–2014	306
10.10	High-tech Exports in the Manufactured Exports of Selected ASEAN Countries, 1988–2015	308
10.11	Patent Applications of Selected ASEAN Countries, 1963–2015	309
10.12	Resident Patent Applications of Selected ASEAN Countries, 1963–2015	310
10.13	Scientific Journal Publications of Selected ASEAN Countries, 1996–2015	311
10.14	Intellectual Property Receipts of Selected Economies, 1976–2015	312
10.15	Intellectual Property Trade Balance of Selected Economies, 1980–2015	312
