This report was prepared by the Working Group for the Study on the Influence on 3Es by Electric Vehicle Penetration in ASEAN under the Economic Research Institute for ASEAN and East Asia Energy Project. Members of the working group agreed to utilise certain data and methodologies to assess the influence of electric vehicles in Indonesia, Thailand, Malaysia, and Viet Nam. These data and methodologies may differ from those normally used in those countries. The calculated result presented here should not, therefore, be viewed as official national analyses.
