

## List of Figures

|             |   |    |
|-------------|---|----|
| Figure 2.1  | LNG Import Dependence in Total Natural Gas Supply and the Role of LNG in Power Generation | 7  |
| Figure 2.2  | Gas Supply Plan in Thailand   | 8  |
| Figure 2.3  | Power Generation by Fuel Type in Thailand   | 10 |
| Figure 2.4  | Tsunami at Minato LNG Receiving Terminal in Sendai, Japan                                 | 15 |
| Figure 2.5  | Disruption Scenarios and the Effect of LNG Stock  | 18 |
| Figure 2.6  | Energy Flow in Thailand in 2011   | 19 |
| Figure 3.1  | Thailand's Commercial Primary Energy Consumption  | 22 |
| Figure 3.2  | Natural Gas Supply Chain in Thailand  | 23 |
| Figure 3.3  | Natural Gas Market Players in Thailand  | 24 |
| Figure 3.4  | Natural gas Pipeline Network in Thailand  | 26 |
| Figure 3.5  | Volume and Price of LNG Imports in Thailand   | 28 |
| Figure 3.6  | East Gas Quality Management   | 30 |
| Figure 3.7  | Natural Gas Transmission Network in Thailand, by Gas Quality                              | 31 |
| Figure 3.8  | Natural Gas Flow in Thailand  | 32 |
| Figure 3.9  | Power Generation by Fuel Type in Thailand   | 34 |
| Figure 3.10 | Power Market Players in Thailand  | 35 |
| Figure 3.11 | Main Natural Gas Flow to Power Plants in Central, Eastern, and Western Regions, 2016      | 35 |
| Figure 3.12 | Monthly Peak Electricity Demand vs Installed Generation Capacity, 2013-2016               | 37 |
| Figure 3.13 | Main Natural Gas Flow in Thailand: Base Case  | 54 |
| Figure 3.14 | Main Natural Gas Flow in Thailand: Scenario A   | 55 |
| Figure 3.15 | Main Natural Gas Flow in Thailand: Scenario B– Day 1–47                                   | 56 |
| Figure 3.16 | Main Natural Gas Flow in Thailand: Scenario B – Day 48–180                                | 57 |
| Figure 3.17 | Main Natural Gas Flow in Thailand: Scenario C   | 58 |
| Figure 3.18 | Main Natural Gas Flow in Thailand: Scenario D – Day 1–30                                  | 59 |
| Figure 3.19 | Main Natural Gas Flow in Thailand: Scenario D – Day 31–180                                | 60 |

## List of Tables

|           |   |    |
|-----------|---|----|
| Table 2.1 | Status of Fossil Fuels Used in the East Asia Summit Region                        | 4  |
| Table 2.2 | Natural Gas Utilisation in Myanmar, the Philippines, Thailand, and Viet Nam       | 6  |
| Table 2.3 | Thailand's LNG Procurement  | 9  |
| Table 2.4 | Example of Risk Sources   | 11 |
| Table 2.5 | Risk Sources of LNG Disruption and Its Amount and Duration                        | 12 |
| Table 2.6 | LNG Disruption Scenarios: Amount and Duration for Thailand                        | 16 |
| Table 3.1 | Existing LNG Receiving Terminal in Map Ta Phut, Rayong, Thailand                  | 27 |
| Table 3.2 | Installed Power Generation Capacity vs Actual Generation in Thailand, by Player   | 36 |
| Table 3.3 | Installed Power Generation Capacity vs Actual Generation in Thailand by Fuel Type | 37 |
| Table 3.4 | Existing Long-Term LNG Contracts in Thailand                                      | 38 |
| Table 3.5 | LNG Disruption Scenarios  | 38 |
| Table 3.6 | Possible Countermeasures in the Event of LNG Import Disruption in Thailand        | 40 |
| Table 3.7 | Countermeasures Taken and Their Impacts   | 49 |
| Table 3.8 | Natural Gas Volumes at East and West Gas Entries and Exits by Scenario            | 53 |
