

Acknowledgement

This report was prepared in close collaboration between Economic Research Institute for ASEAN and East Asia (ERIA) and the United Nations Conference on Trade and Development (UNCTAD). We are grateful for advice from Shujiro Urata, Fukunari Kimura, Pamela Coke Hamilton, and Bonapas Onguglo.

The Data on NTMs for the ASEAN countries are the result of hard work and great efforts of the 10 ASEAN national teams. The core team in developing the NTM Database also includes colleagues from ERIA –Doan Ha and Rizqy Anandhika, and from UNCTAD –Santiago Fernández de Córdoba, Fabien Dumesnil, Denise Penello-Rial, Samuel Munyaneza, Michelle Ayu Chinta Kristy, Chi Le Ngo, Maxim Gubarev, and Ming Cong Li.

The report benefited from constructive comments on a number of chapters by Richard Baldwin, Julien Gourdon, Bernard Hoekman, and Robert Hamwey. We would thank excellent work of the ERIA’s editorial team –Fadriani Trianingsih, Stefan Wesiak, and Abigail Ho.

We would also like to extend our appreciation to all ASEAN Member States and government officials, the WTO, OECD, ASEAN Business Advisory Council (ABAC), ASEAN–EU BAC, ASEAN–US BAC, and ERIA Research Network, who significantly contributed to the success of this project. They worked with us to support governments and the business community to have more transparent NTMs and a better understanding of them, to design better NTMs and better implement them, and to move towards better trade and investment policy and regulations.

Financial support by ERIA and ASEAN Governments for Data Collection and Report, and UNCTAD for team workshops is gratefully acknowledged. We also acknowledge the support of the French National Research Agency under the ANR-10-LABX-14-01 programme, provided to Jaime de Melo and Olivier Cadot.
