This report was prepared by the Working Group for Analysis of Energy Saving Potential in East Asia under an Energy Research project conducted by the Economic Research Institute for ASEAN and East Asia (ERIA) in 2019–2020. Members of the Working Group, who represent the participating countries of the East Asia Summit (EAS) region, discussed and agreed to certain key assumptions and modelling approaches to enable harmonisation of the forecasting techniques. These assumptions and modelling approaches may differ from those normally used in each country. Therefore, the projections presented here should not be viewed as official national projections of the participating countries.
