## List of Figures and Tables

Figures	
1.1 Study Sample	2
1.2 COVID-19 Daily Confirmed Cases and Stringency Index	3
Tables	
1.1 Completion Rate	5
1.2 Reasons for Proxy	6
1.3 Deceased Respondents	7
2.1 Characteristics of Completed Respondents	8
2.2 Distribution of Respondents, by Age Group	9
2.3 Distribution of Respondents, by Sex	10
2.4 Characteristics of Respondents Who Have Caregivers	11
3.1 Source of Respondents' Income, with Decreasing Trend	14
3.2 Source of Respondents' Income, with Increasing Trend	15
3.3 Number of Sources	18
3.4 Income Changes of Older People	20
3.5 Income Changes of Caregivers	21

3.6 Impact of Income Changes on Food Consumpstion	23
3.7 Coping Strategy Against Income Decrease During the Pandemic	26
3.8 Types of Assistance Received by Respondents During the Pandemic	29
3.9 Number of Assistance Types Received by Respondents During the Pandemic	31
3.10 Percentage of Respondents Who Received Assistance During the Pandemic from Individuals and/or Groups Living in the Same Village, Dusun, RW, or Banjar	32
3.11 Types of Assistance Received by Respondents Whose Income Decreased	33
3.12 Number of Types of Assistance Received by Respondents Whose Income Decreased	35
3.13 Percentage of Respondents Whose Income Decreased and Who Received Assistance from Individuals and/or Groups Living in the Same Village, Dusun, Rukun Warga, or Banjar	36
3.14 PKH Assistance Before and During the Pandemic	38
3.15 Non-cash Food Assistance Before and During the Pandemic	39
4.1 Respondents Who Reported their Health Conditions Deteriorated  During the Pandemic	42
4.2 Respondents Who Had Difficulty in Activities of Daily Living (IADL)	43
4.3 Comorbidity Score Change from Before the Pandemic	45
4.4 Morbidity Rates of Six Chronic Conditions Before and During the Pandemic	46

4.5 Practices to Maintain Physical Health, with and Increasing Trend	48
4.6 Practices to Maintain Physical Health, with and Declining Trend	49
4.7 Change of Depression Scores	52
4.8 Respondents Suffering from Abuse	54
4.9 Practices to Maintain Mental Health, with a Declining Trend	56
4.10 Practices to Maintain Mental Health, with a Increasing Trend	58
4.11 Respondents Who Had Difficulty Accessing Health Facilities During the Pandemic	60
4.12 Reason for Difficulty Accessing Health Facilities, with Declining Trend	61
4.13 Reason for Difficulty Accessing Health Facilities, with Increasing Trend	63
4.14 Respondents Who Delayed Consultation in Health Facilties During the Pandemic	65
4.15 Shortage of Routine Medicine During the Pandemic	67
4.16 Reasons for Shortage of Routine Medicine During the Pandemic, with an Increasing Trend	68
4.17 Reasons for Shortage of Routine Medicine During the Pandemic, with an Declining Trend	69
5.1 Social Relations with Relatives, Friends, and/or Neighbours During the Pandemic	73
5.2 Participation in Community Activities During the Pandemic	74

5.3 Support for Family and Community During the Pandemic	77
5.4 Public and Social Support from Posyandu Cadres, Health Wrokers, and Social Cadres, with Increasing Trend	80
5.5 Public and Social Support from Posyandu Cadres, Health Wrokers, and Social Cadres, with Decreasing Trend	81
5.6 Support from Family and Community During the Pandemic	83
Appendix 1: Characteristics of Older People Households	92
Appendix 2: Support Team	95
