

## Acknowledgement

This project received tremendous support from Japan's Ministry of Economy, Trade and Industry (METI). Many findings on the model case study (MCS) and the current state of the regulatory framework included in the report are based on a METI-commissioned research project since 2019. The invaluable advice from METI throughout the planning and implementation stages of the project enabled a fruitful discussion on the topic of proposing collective action for CCUS. The project members also extend their appreciation to the members of the Asia CCUS Network Advisory Group, organised by the Economic Research Institute for ASEAN and East Asia (ERIA), and all speakers at the technical workshop and the MCS workshop who willingly participated in discussions and provided valuable inputs to our study.
