This special report was prepared by the Working Group for Analysis of Energy-Saving Potential in East Asia under an energy research project conducted by the Economic Research Institute for ASEAN and East Asia in 2020–2021 to capture the coronavirus disease (COVID-19) pandemic's impact on energy demand and energy-saving potential. The working group members, who represent the participating countries of the East Asia Summit, discussed and agreed on key assumptions and modelling approaches to harmonise forecasting techniques. The assumptions and modelling approaches may differ from those normally used in each country. Therefore, the projections presented here should not be viewed as official.

The findings, interpretations, conclusions, and views expressed in their respective chapters are entirely those of the author/s and do not reflect the views and policies of the Economic Research Institute for ASEAN and East Asia, its Governing Board, Academic Advisory Council, or the institutions and governments they represent. Any error in content or citation in the respective chapters is the sole responsibility of the author/s.
