

List of Figures

Figure 1.1	Generic Pyramid of Manufacturing Sector Indicators	4
Figure 1.2	Illustration of EEI Tracking of a Drying Process	5
Figure 1.3	Example of EUI Tracking in an Oleochemical Plant	6
Figure 1.4	Illustration of Scattered EUI Data	8
Figure 1.5	Generic Pyramid of Commercial Sector Indicators	9
Figure 1.6	Singapore's Average EUI Trend by Commercial Building Types	11
Figure 1.7	Example of Outlier BEI Data	12
Figure 2.1	Cement Factory EUIs Computed from Survey Data	18
Figure 2.2	Sugar Factory EUIs Computed from Survey Data	21
Figure 2.3	Food Sector EUIs Computed from Survey Data	23
Figure 2.4	Beverage Sector EUIs Computed from Survey Data	25
Figure 2.5	Computed Office Building EUI vs GFA Based on 2018 Data	29
Figure 2.6	Computed Office Building EUI vs Total Yearly kWh Based on 2018 Data	30
Figure 2.7	Computed Office Building EUI vs GFA Based on 2019 Data	30
Figure 2.8	Computed Office Building EUI vs Total Yearly kWh Based on 2019 Data	30
Figure 2.9	Computed Retail Building EUI vs GFA Based on 2018 Data	31
Figure 2.10	Computed Retail Building EUI vs Total Yearly kWh Based on 2018 Data	31
Figure 2.11	Computed Retail Building EUI vs GFA Based on 2019 Data	31
Figure 2.12	Computed Retail Building EUI vs Total Yearly kWh Based on 2019 Data	32
Figure 2.13	Illustration of 2018 Office Data Validation Exercise #1	33
Figure 2.14	Illustration of 2018 Office Data Validation Exercise #2	34
Figure 2.15	Illustration of 2018 Office Data Validation Exercise #3	35
Figure 2.16	Comparison of Average EUI from 2018 Office Data Based on the Normalisation of Average Operating Hours to 38.5 h/week and 124 h/week Using the Box and Whisker Method, Prepared by ERIA	36

List of Tables

Table 1.1	Example of Energy Consumption Data and Computation of Energy Consumption	7
Table 1.2	Example of Measurement Units for Production Outputs	7
Table 1.3	Example of Potential Sources of Errors	8
Table 1.4	Example of Potential Sources of Errors	12
Table 2.1	Preliminary Analysis and Computation of EUI Based on PIEMPI Data Submitted on 27 August 2022	15
Table 2.2	Preliminary Analysis and Computation of EUI based on PIEMPI Data Submitted on 1 and 2 October 2022	17
Table 2.3	Number of Survey Samples Collected and Used in the Analyses	18
Table 2.4	Range of Cement Sector EUI Computed from the Survey Data	19
Table 2.5	Distribution of Energy Usage in the Cement Sector	19
Table 2.6	Distribution of Energy Used in Cement Production Processes	20
Table 2.7	Range of Sugar Sector EUI Computed from Survey Data	20
Table 2.8	Distribution of Energy Used in Sugar Production Processes	21
Table 2.9	Range of Food Sector EUI Computed from Survey Data	22
Table 2.10	Variations in Food Sector EUIs Due to Product Variations	22
Table 2.11	Share of Energy Usage by Percentages in Food Sector	23
Table 2.12	Distribution of Energy Used in Production Processes of the Food Sector	24
Table 2.13	Range of Beverage Sector EUIs Computed from Survey Data	24
Table 2.14	Variations in Food Sector EUIs Due to the Nature of Products	25
Table 2.15	Share of Energy Usage by Percentages in Beverage Sector	26
Table 2.16	Distribution of Energy Used in the Production Processes of the Beverage Sector	26
Table 2.17	Summary and Comparison of EUIs	26
Table 2.18	Estimation of Average EUI from 2018 and 2019 Data Using X-Bar and R-Chart Method, Prepared by ERIA	37
Table 2.19	Final Analysis and Computation of EUIs Reported by the MPA	38
Table 2.20	Number of Samples Collected and Used in Analysis	42
Table 2.21	Summary of EUIs Estimated by MPA and ERIA Based on the 2018–2019 Survey Data	42
