## **Globalization of Low-Carbon Technologies: The Impact of the Paris Agreement**

*Edited by Venkatachalam Anbumozhi and Kaliappa Kalirajan*

This book explores the opportunities and barriers within the Intended Nationally Determined Contributions (INDC) framework of the Paris Agreement for the diffusion of low-carbon technology. Further, it proposes appropriate and feasible mechanisms required at the local, national, and regional levels to achieve the INDC targets.

The book employs both meta policy analysis and scenario building to examine whether the diffusion of low-carbon energy by 2030 is economically viable under the INDC framework and how international technology cooperation could accelerate investments on the scale required for achieving the INDC targets.

Further, this book provides new perspectives on market and non-market mechanisms for the globalisation of low-carbon technologies within the framework conditions of the Paris Agreement, which will be of significant value to senior policymakers, multi-disciplinary academics, and investing communities.

## Social Protection Goals in East Asia: Strategies and Methods to Generate Fiscal Space

*Edited by Mukul G. Asher, Fauziah Zen, and Astrid Dita*

The book examines the conceptual, economic, and fiscal impact(s) of the Social Protection Floor initiative of the International Labour Organization (ILO) and other policy influencers by first critically examining the methodologies used by the international agencies to estimate the fiscal costs of designated minimum package(s) of social protection programmes. The book also briefly reviews the methodologies used and usefulness of the Social Protection Index of the Asian Development Bank.

Second, the book analyses strategies and specific initiatives used by selected East Asian countries (China, India, Indonesia, Philippines, Thailand, and Viet Nam), designed to progress towards the social protection goals underlying the Social Development Goals adopted by the United Nations in September 2015, and endorsed by the countries covered in this book.

Finally, the book provides a framework for generating fiscal space to fund the social protection programmes and initiatives. The country chapters use this framework in the context of each specific country to suggest generating fiscal space.

## The Indonesian Economy: Trade and Industrial Policies

*Edited by Lili Yan Ing, Gordon H. Hanson, and Sri Mulyani Indrawati*

Against the backdrop of growing anti-globalisation sentiments and increasing fragmentation of the production process across countries, this book addresses how the Indonesian economy should respond and how Indonesia should shape its trade and industrial policies in this new world trade environment. The book introduces evaluation not on tariffs but on new trade instruments such as non-tariff measures — sanitary and phytosanitary, technical barriers to trade, export measures, and beyond border measures – and looks at industrial policies from a broader perspective such as investment, accessing inputs, labour, services, research, and innovation policies.
